An Important Announcement from Americhem

We are pleased to announce that Americhem's integration of Infinity LTL is progressing extremely well and, effective immediately, the single organization will be known as Americhem. Since acquiring Infinity and LTL, the joint team is now better positioned to provide more innovative solutions to you, our valued customer. Our portfolio of product offerings has grown, and we now can offer you more technologies and solutions than ever before. One Americhem is committed to continue to provide you with the highest quality of products and services that you demand and deserve.

In the coming weeks and months, you will notice that some of our documentation, email addresses and other branding will transition to reflect the new company name. You will continue to have the same company contacts, product codes and product brands for continuity of specifications and end use purposes.

Please be assured that we are doing our best to make this transition smooth and seamless. There will be no change to the way business is transacted. You will be dealing with the same customer service representatives, sales personnel and other staff with which you are already accustomed. If you have any concerns, comments or questions, please let us know.

We wish you all the best and look forward to continuing to serve you in the manner that you have come to expect.

Best regards,
Jim Figaniak
Vice President & General Manager
Americhem Engineered Compounds
