INFINITY LTL INTRODUCES LINE OF TPE PRODUCTS

MORRISVILLE, PENNSYLVANIA (March 14, 2017) – Infinity LTL Engineered Compounds, a global manufacturer of custom compounded engineered thermoplastics, has announced a new line of thermoplastic elastomer (TPE) products with grades for specialty compounding. These products provide a variety of functionalities in addition to varying degrees of rigidity or softness.

“These TPE compounds are focused on the customer and the desired application, giving processors flexibility and function in their TPE products,” said Steve Schlegel, marketing and distribution channel manager for Infinity LTL. “The product line offers a variety of TPE technologies including styrenic block copolymers, thermoplastic vulcanizates and thermoplastic urethanes. We are able to completely customize these products depending on the manufacturer’s application, equipment and desired end-use properties.”

These new compounds can be made in a wide range of durometers. There are grades for soft touch overmolding and as well as customizable and standard grades of the compounds. Many of the products are part of Infinity LTL’s Colorfast[®] line of precolored compounds, while others in the ColorRx[®] line are for the healthcare and medical device industries. Functional properties can include structural reinforcement, flame retardancy, electrical conductivity, wear resistance and density modification.

Customers from a variety of industries can benefit from these TPE compounds. Applications range from consumer goods to industrial products, as well as healthcare devices and other medical products.

As with all Infinity LTL products, they are offered with short lead times, no minimum order quantities and complete regulatory support.

For more information about these compounds, visit www.ltlcolor.com or www.americheminfinity.com or contact Steve Schlegel at sschlegel@ltlcolor.com.

About Infinity LTL Engineered Compounds

Infinity LTL Engineered Compounds, located in Morrisville, Pennsylvania, and Swedesboro, New Jersey, manufactures and sells engineering grade, custom compounded precolored polymer composites to meet the demands of specific customer applications. The company specializes in a wide range of engineered polymers with no minimum order size and provides a high level of technical support and a flexible customer-focused style. The company also offers a wide array of reinforcements, fillers and lubricants that enhance the base resin properties for many engineering resins. For more information, visit ltlcolor.com or call 800-863-4260.
